

RUTGERS, The State University of New Jersey, invites your students to apply to our highly successful summer program, RiSE (Research in Science and Engineering) at Rutgers/UMDNJ, <http://rise.rutgers.edu>. Applicants should be motivated to pursue graduate study. We particularly encourage students from PUIs as well as those from underrepresented minority or economically disadvantaged backgrounds or from first-generation college families. Here are some features that distinguish RiSE from many other summer programs:

CUTTING EDGE RESEARCH in over 30 outstanding biological, physical and behavioral science programs, math and engineering, <http://gsnb.rutgers.edu/programs.php3>. We are particularly excited about our interdisciplinary opportunities and are leader in National Science Foundation IGERTs that cross academic disciplines and have broad societal impact, <http://gradstudy.rutgers.edu/IGERT.shtml>. Our IGERTs focus, on renewable and sustainable fuels (biofuels and synfuels), nanotechnology for clean energy, stem cells, and pharmaceutical engineering.

PERSONALIZED MENTOR-MATCHING

OUTSTANDING PROFESSIONAL DEVELOPMENT including training in speaking & writing, GRE prep, career exploration, networking with academic and industrial scientists, and help with travel awards to national conferences.

EXCELLENT FUNDING: Stipend + on-campus housing + travel allowance.

ALUMNI SUCCESS: Awards for presentations at national meetings and admission to prestigious graduate programs

GREAT LOCATION: Only a short train ride from New York City and Philadelphia, Rutgers-New Brunswick has a safe, green campus with easy access to mountains and beaches. We are at the national center of the pharmaceutical and technology industries, and summer students often arrange future internships.

ON-LINE APPLICATION: Rolling admission starts end January and is highly selective. Apply now at <http://rise.rutgers.edu>!
