

Chemistry 103 Extra Credit Opportunity

To increase your understanding of how chemistry concepts are applied in your intended career, you may earn up to 10 additional points to improve your quiz grade by (i) conducting an interview with a healthcare professional in your field and (ii) submitting a report based on this interview. Your summary report must be at least 1-2 well-written pages, word processed, double spaced, use 12 point font, have a business card of the person you interviewed attached, and provide the following information:

- i. the name of the healthcare professional you interviewed and his/her specific vocation;
- ii. how long this person has had a career in his/her area of expertise;
- iii. who has been a key role model for this individual;
- iv. any assumptions you had before the interview about the role of chemistry in this vocation;
- v. the chemistry concept(s) that actually serve an important role in the career of this person;
- vi. how these chemistry concept(s) are applied in a real-world setting or application;
- vii. where the healthcare professional first learned about these chemistry concepts;
- viii. how your impression about the role of chemistry in this field has or has not changed; and
- ix. how this interview experience has impacted your desire to pursue a career in this field.

The extra-credit reports may be submitted at any time but are to be turned in no later than Friday, April 20th.
