WHY DO RESEARCH AT HOPE COLLEGE?

Hope College has a long, rich history of undergraduate research.

Ranked as a top undergraduate research program by U.S. News and World Report.

A research experience that is second to none!

Selection criteria include a strong academic record, interest in chemistry, career plans, independence, creativity, and the potential to benefit from a research experience. All applicants must be enrolled in an undergraduate degree program in the Fall of 2012.

You will work directly with a faculty mentor to answer questions at the forefront of scientific research.

Social activities with over 100 fellow research students occur most evenings.

All continuing Hope students are eligible to apply for a paid summer research position and a housing subsidy.

Choose from a range of externally-funded faculty research projects:

Analytical Chemistry	Medicinal Chemistry
Biochemistry	Organic Chemistry
Computational Chemistry	Photochemistry
Environmental Chemistry	Physical Chemistry
Materials Science	Neurochemistry
Inorganic Chemistry	Spectroscopy

Funding opportunities for non-Hope applicants through an National Science Foundation Research Experience for Undergraduates award to Hope College are available for students who are U.S. citizens from underrepresented minorities or students who are currently enrolled at two-year colleges. Qualified students will receive a stipend of \$4600 for the 10 week program with 100% housing subsidy, and travel reimbursement. Hope College students who are members of underrepresented minorities are also eligible for this funding.

Learn more about the specific projects and apply for a summer research position in the Hope College Chemistry program:
