

ED 311 OBSERVATION-REFLECTION LOG

NAME _____ SESSION _____.

Please word process the answers to each of these questions.

1. Consider the use of technology in your classroom as it relates to student learning.

First describe what general education teachers have access to in your school (computers in room, lab, digital cameras, Smart Boards, etc.).

Analyze any software programs at use in your classroom or computer lab as to their effects on students' critical thinking.

Do the students have Internet access?

How are websites screened prior to student use?

Does your Field Placement teacher use the web for research and/or lesson preparation?

Reflect on the use of any other technology in the classroom to enhance student learning. (What is used , not just what is available .

- 2, Consider the use of technology to support classroom management and teacher professional development.

What kinds of technology are teachers in your district using as part of their daily routines? (Attendance, report card technology, grade books, etc.)

What kinds of technology in-service programs are given regularly in your district?

Are new teachers required to have specific skills in technology?
