

Technology and Lesson Design Assignment

Develop a five (5) lesson sequence for a Science unit.

Each lesson will follow the Learning Cycle method of teaching.

Included in the lessons will be the following:

- title, grade level, and MI Science objectives
- hands on activities (every lesson)
- technology* (at least one of the 5 lessons)
 - *at least one CD-ROM program and at least one web site
- assessment of unit for student and teacher
- see the attached lesson for format

ED 310- Curriculum & Methods Technology Lesson Plans Evaluation

Assessment Rubric

5=Excellent 4=Good 3=Average 2=Weak 1=Poor

Lessons objective clearly stated and taught	
Technology used to teach the objective	
Lessons followed the Learning Cycle method	
Title, Grade Level and MI Science Objective stated	
Hands-on activity for every lesson	
Technology in at least one lesson	
Assessment format included	
Lessons are creative and useful to the age level taught
