

**ED. 226 Field Experience**

**Evaluation and Recommendations for Power Point Presentations**

Name SARAH SUDNICK Section of ED 225 - 01-02-03-04 - evening  
(Circle one please) class

In place of written logs and journals we have chosen to have you design and present your field experiences using Power Point. Our goals for this project are:

1. To increase oral communication skills
2. To meet requirements in the brochure for the field placement
3. To learn information about other field placements
4. To learn Power Point

Please evaluate this project in the following areas:

1.) Positive Aspects

- SO important to learn power point for future use
- A way for us to use presentation and oral skills which is so crucial - to be able to communicate orally w/o word for word scripts
- A fun and exciting way to learn about other students placements - really enjoy presenting in small groups - more personal.

2.) Negative Aspects

NONE

3.) Recommendations/Suggestions

continue with power point presentations - definitely a positive learning experience for everyone.
