

Engineering for Non-Engineers and Technological Literacy

Bibliography and Reference Resources

Compiled by:
ASEE Technological Literacy Constituent Committee
June 2009

This is a compilation of journal article and conference proceeding publications on technological literacy of undergraduates and courses about engineering topics for non-engineering students. This is intended to be a resource to prior work on these topics for those entering the field. An effort was made to make this a comprehensive list however, as working document; undoubtedly some articles have been missed. Send additions or corrections to: John Krupczak (krupczak@hope.edu).
