

Parallel Processing over Mobile Ad-hoc Networks

Michael Jipping

Computer Science Department
jipping@cs.hope.edu
(616) 395-7509

B.S. in Computer Science (1981), Calvin College.
M.S. in Computer Science (1984) Univ of Iowa.
Ph.D. in Computer Science (1986), Univ of Iowa.

Areas of expertise: mobile ad-hoc computing, smartphone operating systems

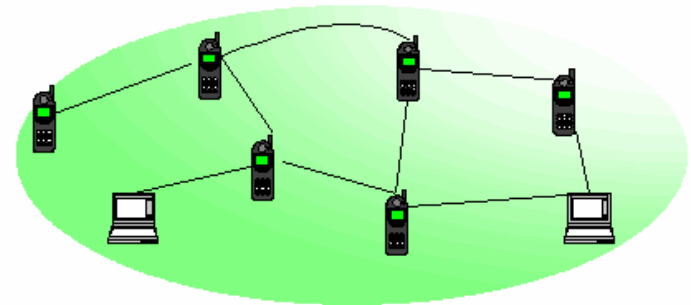

Current Grant Support:

Implementing and Simulating Hardware in Computer Architecture Classes", NSF 2003-2006.

M. Jipping, S. Henry, K. Ludewig, and L. Tableman
How to Integrate FPGAs into a Computer Organization Course, SIGCSE 2006.

M. Jipping, A. Kalafut, N. Kooistra, and K. Ludewig,
Investigating Wired and Wireless Networks Using a Java-based Programmable Sniffer, ITiCSE 2004.

Acknowledgements: NSF and Symbian, Ltd.

Parallel processing can occur over mobile ad-hoc networks comprised of many types of computers, from mainframes to desktops to mobile phones.
