

FIDELITY INVESTMENTS® MUTUAL FUNDS PERFORMANCE REPORT

PERFORMANCE UPDATE

AS OF JUNE 30, 2009

UNDERSTANDING INVESTMENT PERFORMANCE

As you review this update, please remember that the performance data stated represents past performance, which does not guarantee future results. Investment return and principal value of an investment will fluctuate; therefore, you may have a gain or loss when you sell your shares. Current performance may be higher or lower than the performance stated. To learn more or to obtain the most recent month-end performance, call Fidelity at 1-800-343-0860 or visit <https://www.mysavingsatwork.com> (log in, choose plan, select "Investment Choices & Research," and then pick investment option).

Name	Cumulative Total Returns %		Average Annual Total Returns %		
	3 Month	YTD	1 Year	5 Year	10 Year
Barclays Capital U.S. Intermediate Government/Credit Bond Index ^①	1.67	1.62	5.27	4.57	5.66
Dow Jones Industrial Average	11.96	-2.01	-23.00	-1.68	-0.41
MSCI EAFE [®] Index	25.61	8.10	-31.25	2.52	1.43
Standard & Poor's 500 SM Index	15.93	3.16	-26.21	-2.24	-2.22

Total returns are historical and include change in share value and reinvestment of dividends and capital gains, if any. Cumulative total returns are reported as of the period indicated. Life of fund figures are reported as of the inception date to the period indicated. These figures do not include the effects of sales charges, if any, as these charges are waived for contributions made through your company's employee benefit plan. If sales charges were included, returns would have been lower.

With the exception of domestic equity mutual funds, investment options have been assigned to investment categories based on Fidelity's analysis. Fidelity has verified the accuracy of the placement of certain third-party non-mutual funds with either the plan sponsor or the plan sponsor's consultant. Within Domestic Equities, mutual funds are listed according to their actual Morningstar categories as of the date indicated. Morningstar categories are based on a fund's style as measured by its underlying portfolio holdings over the past 3 years and may change at any time. These style calculations do not represent the funds' objectives and do not predict the funds' future styles.

SPECIFIC FUNDS

- ✦ For a mutual fund, the expense ratio is the total annual fund or class operating expenses (before waivers or reimbursements) paid by the fund and stated as a percent of the fund's total net assets. Where the investment option is not a mutual fund, the figure displayed in the expense ratio field is intended to reflect similar information. However, it may have been calculated using methodologies that differ from those used for mutual funds. Mutual fund data has been drawn from the most recent prospectus. For non-mutual fund investment options, the information has been provided by the trustee or plan sponsor. When no ratio is shown for these options it is due to the fact that none was available. Nevertheless, there may be fees and expenses associated with the investment option.
- Fidelity is temporarily reimbursing a portion of the fund's expenses. Absent such reimbursement, returns would have been lower.
- Total returns shown prior to September 19, 2002, are those of Fidelity Advisor Floating Rate High Income Fund Institutional Class, which commenced operations on August 16, 2000. Total returns shown since September 19, 2002 are **Fidelity Floating Rate High Income Fund**.
- ▲▲ Formerly known as Fidelity Aggressive Growth (1/30/09).
- Prior to 10/1/2006 these Fidelity[®] Select Portfolios[®] operated under certain different investment policies, and compared their performance to different benchmarks. The fund's historical performance might not represent its current investment policies.
- ✦ Formerly known as Fidelity Select Utilities Growth (1/16/09).
- Formerly known as Fidelity Utilities (1/16/09).
- ① Formerly known as Lehman Brothers Intermediate U.S. Government/Credit Index.

MARKET INDICATORS

- ^^ Indices are unmanaged and you cannot invest directly in an index.
- Barclays Capital U.S. Intermediate Government/Credit Bond Index** is a market value-weighted index of investment-grade fixed-rate debt securities with maturities from one up to (but not including) ten years from the U.S. Treasury, U.S. Government-Related, and U.S. Corporate Indices.
- Dow Jones Industrial Average**, published by Dow Jones & Company, is a price-weighted index that serves as a measure of the entire U.S. market. The index comprises 30 actively traded stocks, covering such diverse industries as financial services, retail, entertainment, and consumer goods.
- Morgan Stanley Capital International Europe, Australasia, and Far East (MSCI EAFE[®]) Index** is a market capitalization index that is designed to measure the investable equity market performance for global investors in developed markets, excluding the US & Canada. Index returns for periods after January 1, 1997, are adjusted for tax withholding rates applicable to U.S.-based mutual funds organized as Massachusetts business trusts.
- The S&P 500[®] Index** is a registered service mark of The McGraw-Hill Companies, Inc., and has been licensed for use by Fidelity Distributors Corporation and its affiliates. It is an unmanaged index of the common stock prices of 500 widely held U.S. stocks that includes the reinvestment of dividends.

INVESTMENT RISK

- These funds are subject to the volatility of the financial markets in the U.S. and abroad and may be subject to the additional risks associated with investing in high-yield, small-cap and foreign securities.
- * An investment in a money market fund is not insured or guaranteed by the FDIC or any other government agency. Although money market funds seek to preserve the value of your investment at \$1 per share, it is possible to lose money by investing in these funds.
- In general, bond prices rise when interest rates fall, and vice versa. This effect is usually more pronounced for longer-term securities.
- ⚙ The fund may invest in lower-quality securities that generally offer higher yields, but also carry more risk of default or price changes due to potential changes in the credit quality of the issuer. In addition, bond funds entail interest rate risk (as interest rates rise bond prices usually fall and vice versa).
- †† Foreign investments, especially those in emerging markets, involve greater risk and may offer greater potential returns than U.S. investments. This risk includes political and economic uncertainties of foreign countries, as well as the risk of currency fluctuation.
- ⚙ Investments in mid-sized companies may involve greater risks than those of larger, more well-known companies, but may be less volatile than investments in smaller companies.
- ◆ Investments in smaller companies may involve greater risks than those of larger, more well-known companies.
- Because of their narrow focus, sector funds may be more volatile than funds that diversify across many sectors.

Before investing in any mutual fund, please carefully consider the investment objectives, risks, charges and expenses. For this and other information, call Fidelity at 1-800-343-0860 or visit www.fidelity.com for a free mutual fund prospectus. Read it carefully before you invest.
