

I-D, Interactions between 2-yr and 4-yr programs

Join Dr. Tom Higgins, chemistry faculty member at Harold Washington College in Chicago, to talk about how programs such as the highly successful NSF Undergraduate Research Collaboratives (URC) help prepare students to move from community colleges to four year programs. The discussion will also look at how the new Guidelines for Chemistry in Two-Year College Chemistry Programs are designed and coordinated with the CPT Guidelines published in 2008.
